About US

40

Over 40 years of experience in industrial automatic weighing represent our capacity of innovating ourselves and promptly satisfying our customers' requests.

Operating in over 50 Countries

Our products are so versatile, reliable, efficient and easily integrable in line to be chosen by manufacturers from over 50 Countries, all over the World.

Certified Reliability

The entire range of NEMESIS machines features type-approval certification according to OIML R-51 2006 and MID-2004/22/ EC regulations.

NEMESIS is an ISO 9001 certified company, unparalleled guarantee of quality.

100% Made in Italy

We're proud that all our machines are entirely designed and realized at our headquarters of Modena (Italy) by our Research & Development division.

Ecological

Our products are built taking care of the productive processes, in order to minimize the environmental impact and the energy consumption.

Customization and optimization

Since your efficiency is our focus, we develop customized solutions to perfectly integrate our systems even in the most complex and articulated lines.

We Weigh Everything.
Just Everything.
Thousands and thousands of solutions,
for any kind of application.

Our **mission** is offering customized and tailor-made **solutions** for every kind of application, with a technology **always at the state of the art**.

Over **40 years of experience** in industrial weighing allow us to design and manufacture **checkweighers** and **weigh-price labelers** able to respond to your more specific needs.

100% made in Italy. All our products are engineered and realized in Italy, with **first quality materials**, for always top-tier performances, even in hostile conditions and to satisfy the most restrictive **sanitation requirements**.

Each of our systems is tested at our headquarters in Modena, **24 hours/day, 7 days/week**, for at least **3 months**.

www.nemesis.it

Products

MID & OIML R-51

NEMESIS dynamic weighing systems are MID-2004/22/EC and OIML R-51 2006 certified.

EN ISO 9001

NEMESIS is an ISO 9001 certified company, thanks to the quality of our productive processes

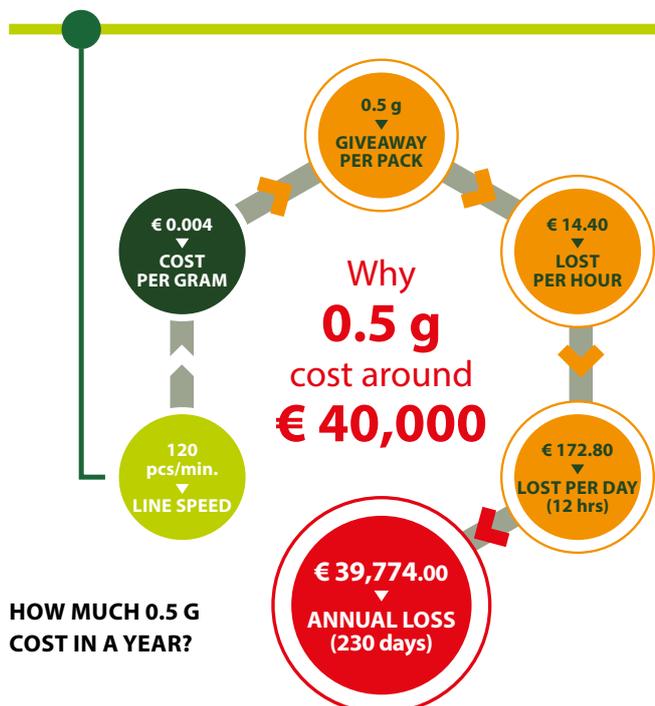

Checkweighers

Weight control to maximize efficiency

NEMESIS checkweighers are dynamic weighing systems that inspect every single product, to overcome the great margins of error related to the manual sampling controls.

They use an exclusive algorithm that allows the fastest product/program change.

NEMESIS systems work with our innovative “real weight” technology, **EasyWeigh®**.

An **EasyWeigh®** system gives certified measurements for every product just having weight and linear speed within the machine’s limits.

Up to 80% energy saving thanks to the compact dimensions and the quality of its materials.

Weigh-Price Labelers

Accuracy and speed for durable labeling

NEMESIS weigh-price labelers are designed to be modular and versatile. Always accurate, even at the highest speed, they have a user-friendly operator's interface that grants an easy data editing, directly on the touchscreen control panel, besides the main network PC.

The labeling systems may apply on the top, front, side and/or bottom face of the products.

Combo metal-detector

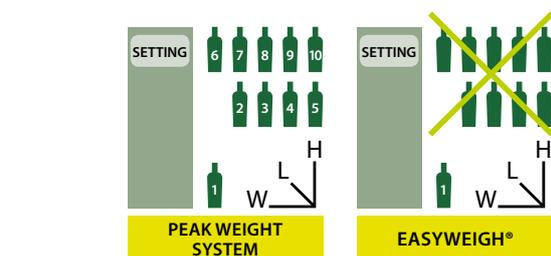

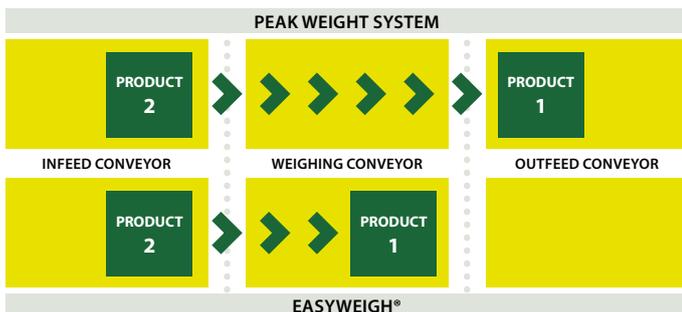

Integrated weighing system with the metal contamination detection.

The checkweigher+metal-detector combination grants a complete control of the products in a reduced space, with a unique solution designed for the maximum performances.

Standard **"peak weight"** checkweighers need a gap between products being a little longer than the weighing conveyor. **EasyWeigh®** checkweighers, on the contrary, just need the pitch between two products to be a little greater than the weighing conveyor's length.

EasyWeigh® technology allows to weigh every new product regardless from the shape, format or line orientation without the need for any calibration or learning procedures.

EASYWEIGH®: NO LEARNING TIME

Checkweighers

Accuracy and speed for a real-time quality control

*Checkweighers for the in-line
inspection of products from 0.01 g
to 60 Kg.*

*Suitable for all kinds of solid, liquid,
packed, bulk or viscous products.*

www.nemesis.it

NEMESIS checkweighers are versatile and easy to use. Our range responds to all the weight requirements, with the best accuracy/speed ratio.

Learning times are reduced to 0, thanks to the innovative **EasyWeigh®** dynamic weighing algorithm. Product switch procedures just require few seconds and can easily be performed directly on the machine's touchscreen control panel.

All our systems only require **minimum maintenance** operations and are **completely and easily cleanable**.

G Series

 IP66

C Series

 15 g up to 8 kg

R Series

 ≤ 600 ppm

S Series

 $d \geq 0.01 \text{ g}$

H Series

 200 g up to 60 kg

C Series

The versatile **checkweigher** for all-round applications

Aerosols

Cans

Chemicals

Cosmetics

Food

Non-food

Pharma

 15 g up to 8 kg

 IP54 (IP65 option)

The innovative **EasyWeigh®** technology allows to operate with C Series checkweighers **without any needs for calibration or product's learning procedures**, unlike the most part of the machines on the market - working with a "peak weight" algorithm.

C Series checkweighers are the compact and modular solution to integrate, at reduced costs, the end-line control in small spaces.

Sturdy and flexible, it can easily be combined with metal-detectors, visual or labeling systems.

Application examples

Pasta bags

Net of fruits

Cheese bits

Tall and thin bottles

Sprays

Multiple candles packs

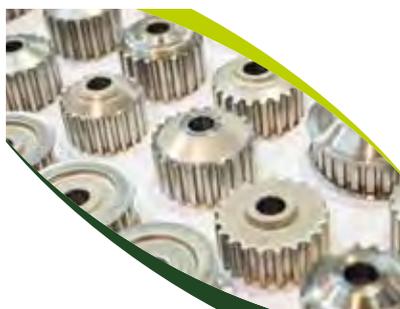

Absorbents and diapers

Paint cans

Candies

Hands and face lotions

Dough balls

Main Features

All-round Player

Compact, accurate, cost-effective solution for the quality control in every industry.

Reliable

Sturdy and flexible, this long-lasting, use-intensive system grants **low maintenance costs**.

User-friendly

With **EasyWeigh®** technology there is **no need for calibration or learning procedures**.

Certified

MID European Directive and **OIML R-51 full certified**. NEMESIS is an **ISO 9001 company**.

15 g up to 8 kg

IP54 (IP65 option)

AUTOMATIC EJECTORS

- Side pneumatic ejector
- High-speed pneumatic ejector
- Air blast ejector
- Double-nozzle air blast ejector
- Rodless pneumatic ejector
- Drop-down ejector

INFORMATION PACKS

- 7" touchscreen control panel
- 10" touchscreen control panel
- NEMESIS Data Manager
- NEMESIS Analytics
- Integrated printer for reports
- Lights and acoustic alarm tower

SECURITY DEVICES

- Air pressure check
- Rejection photocell
- Reject bin full photocell
- Plastic reject bin
- Stainless steel reject bin

APP-SPECIFICS

- Proactive feedback correction
- Remote control panel
- Feeding screw
- Pair of feeding belts
- Reinforced architecture

Technical Datasheet

Capacity	15g up to 8kg
Scale interval "e"	≥ 0.5g
Display resolution "d"	≥ 0.1g
Accuracy (3σ)	≥ ±0.07g
Throughput	≤ 400 ppm
Belt Speed	≤ 120 m/min
Power Consumption	≤ 0.3 kw
Configuration	1 up to 6 conveyors
IP Protection	IP54 (IP65 option)
Height	460 mm up to 1,200 mm
Conveyor(s) width	90 mm up to 456 mm
Conveyor(s) length	150 mm up to 750 mm
Conveyor(s) type	Polyurethane Belt Modular Plastic V-shaped

Drop-down ejector

T-Bar rodless ejector

Case study: Twin Checkweigher for Pasta

This project is an example of our **customization possibilities**: the designed solution is a tailor-made Series C Twin Checkweigher.

Pasta packs run on **two parallel channels**, each scaling the products and ejecting non-complying ones.

The parallel channels can work together at a time as well as individually.

Side ejector

Stainless steel reject bin

S Series

High-speed **checkweigher** for the **lightest weights**

Aerosols

Chemicals

Cosmetics

Non-food

Pharma

 1 g up to 600 g

d ≥ 0.01 g

S Series checkweighers can be integrated with datamatrix one-dimensional or two-dimensional marking systems, display system for monitoring the package and marking, multiple ejector systems with strict separation of the different products rejected.

S Series is the range of checkweighers designed to respond to the modern requests of the **pharmaceutical industry**, with particular focus on the GMP regulations and the stringent quality control reference standards.

Application examples

Bolts and screws kits

Monoportion biscuits

Travel plastic cutlery

Cosmetics

Tall and thin bottles

Sprays

Blisters of pills

Blood glucose testers

Eyewash jars

Candies

Main Features

GMP regulated

Quality control meeting the current **requirements** of the **pharma** industry, first of all **GMP**.

Lightweight Expert

Top class accuracy for **1 gram up** products, even at the **highest** industrial **speed** rates.

User-friendly

With **EasyWeigh®** technology there is **no need for calibration or learning procedures**.

Modular

Fully integrable with **visual control, marking, tracing systems**, barcode readers etc.

1 g up to 600 g

d ≥ 0.01 g

10" touchscreen control panel

Pneumatic ejector for bottles

Case study: Sorting Sprays and Bottles

These systems were properly designed for scaling and sorting bottles, sprays and tall cylindrical products.

Featuring a **double couple of feeding belts**, **extra-small scale** conveyor and **knife-edge conveyor support rollers**, the machine allows a perfectly smooth and sure transfer of the products and a **top-level accuracy**.

Double air-blast ejector

EasySet Assisted feeding belts

G Series

The ideal **checkweigher** for hostile conditions

Chemical

Cans

Jar

Bricks

Cheese

Fish

Meat

 20 g up to 8 kg

 IP66

The flexible, accurate and high-washable solution for the harsh environments.

G Series checkweighers, thanks to their **IP66** protection, have been engineered for the application in **high humidity conditions**.

Especially suitable for the dynamic weighing of unpacked food products, as meat and cheese, they feature a **full stainless steel frame** and an innovative architecture, that allows the **easiest and fastest disassembly, washing and sanitizing operations**.

Application examples

Hamburgers

Soft cheese

Cod

Chicken filets

Berries

Sauces

Parmigiano Reggiano

Seafish

Jams

Chocolate

Main Features

Smart Architecture

Special conveyors' design, for the **fast and easy disassembly** and **removal of the tapes**.

Easy to Wash

100% stainless steel structure and **IP66 protection**: ideal when frequent washing is crucial.

User-friendly

With **EasyWeigh®** technology there is **no need for calibration or learning procedures**.

Certified

MID European Directive and **OIML R-51** full certified. NEMESIS is an **ISO 9001** company.

Side ejector

Case study: Bulk Filets and Hamburgers

Series G checkweighers are specifically designed for **harsh environments** and applications like unpacked products, where **cleaning and sanitizing play a major role**.

Featuring **IP66 protection**, **easy-to-disassembly** smart conveyor's structure, **highly washable** architecture and **100% stainless steel frame**, these systems are the ideal solution for the food processing industry.

Here is a Series G checkweigher in action, scaling and sorting bulk filets and hamburgers.

Quick tape removal

7" touchscreen control panel

R Series

High-speed specialist checkweigher

Aerosols

Cans

Chemicals

Cosmetics

Food

Bricks

Bottling

≤ 600 ppm

IP66K

R Series chain checkweighers combine an **unparalleled sturdiness** with high accuracy, even at the highest working speed, and an innovative design, conceived for the application in harsh industrial environments.

Available in numerous configurations, with 1 to 4 chain conveyors and width measurements ranging from 50 mm to 230 mm, for checking cans, jars and bottles.

Application examples

Soft drink cans

Solvent jars

Canned sardines

Milk bricks

Olive jars

Mayonnaise

Tuna

Shampoo

Coarse salt

Orange juice

Main Features

Extra High-Speed

Suitable for **weighing and sorting** products **up to 600 pieces per minute**, with a top level accuracy.

Invulnerable

IP66K protection, for working in harsh and dirty conditions. **High-pressure waterjet fully washable**.

User-friendly

With **EasyWeigh®** technology there is **no need for calibration or learning procedures**.

Innovative Design

Special chain conveyors, engineered for the best handling of products like cans, sprays etc.

H Series

Checkweigher for huge and heavy products

Chemicals

Logistics

Food

Non-food

Tanks

 **200 g up to 60 kg**

 **IP54 (IP65 option)**

In the modern logistics, the demand to scale and sort large and heavy products is always increasing.

H Series checkweighers are the solution to these exigencies, allowing the fast dynamic **weighing of loads up to 60 Kg.**

With our focus on product handling and production rate, we ensure accurate measuring in all our equipment which guarantees our customers return on investment.

Application examples

Cartons of bottles

Flour bags

Cement in powder form

Milk powder

Pesticides

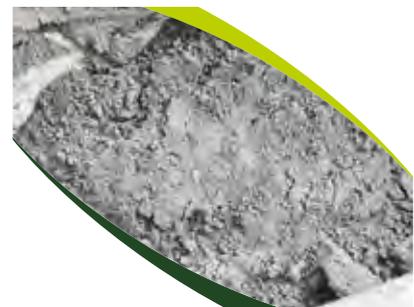

Paints

Watermelons

Fuel tanks

Rice and pasta

Gypsum

Main Features

Tough

Larger rollers, extra powerful servomotors and reinforced frame, for enhanced resistance.

Time-Saving

Automatic control of 100% of the production, to avoid slow and unefficient manual sampling.

User-friendly

With **EasyWeigh®** technology there is **no need for calibration or learning procedures.**

Certified

MID European Directive and **OIML R-51** full certified. NEMESIS is an **ISO 9001** company.

Modular plastic ejection conveyor

Case study: Aggressive Chemicals Tanks

This is a particular Series H Checkweigher, **designed for scaling and sorting tanks of aggressive chemical liquids.**

Not only the heavy weight of the tanks (the system has a **maximum scale capacity of 35,000 g**) but also the risk of product's losses, that could have damaged the conveyors' tapes, were to be considered.

This way, the chosen solution is a checkweigher featuring **three modular plastic conveyors**, in order to avoid the chemical erosion of the belts' tapes, at the same time granting the proper accuracy to discard overweight and underweight tanks.

Reclinable twin conveyors, "V" position

Reclinable twin conveyors, flat position

Weigh-Price Labelers

**Versatile,
accurate, effective.**

*A new generation of weighing and
labelling systems able to provide excellent
performances at an unrivalled cost ratio.*

K Series top applicator

K Series

Designed to **satisfy your needs**

*Each unit can be equipped with **one or more printing units** with a 4" to 6" applicator for top, side, "C" band, bottom and front-facing labelling.*

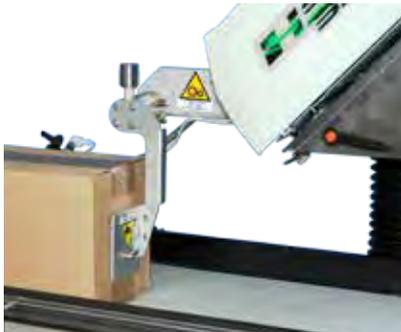

Top Labeler

The label is placed on the **top face** of the products, applied by an **air compressed blast**.

Bottom Labeler

The label is placed on the **bottom face** of the products, **running over the applicator**.

Front Labeler

The label is placed on the **front face** of the products, applied by a **pneumatic labeling arm**.

Side Labeler

The label is placed on the **lateral face** of the products, applied by an **air compressed blast**.

Pneumatic Arm Labeler

The label is placed on the **top face** of the products, applied by a **pneumatic labeling arm**.

Round Products Labeler

Special top labeler's architecture with pairs of **reclinable twin belts**, for the ideal application.

"C" Labeler

The label wraps the product from the top face to the bottom, while running **through the applicator**.

Combo Labeler

Top + side, top + bottom, side + bottom Labelers are just some of our combo configurations.

 15 g up to 30 kg

 IP54 (IP65 option)

NEMESIS weigh-price labeling machines can be **perfectly integrated into production lines** or used as self-standing stations.

Available in numerous configuration, from 1 to 6 conveyors with width from 90 mm to 456 mm.

Application examples

Meat

Carton box

Fruit

Vegetables

Fresh

Bakery

Ready meals

Fish

Logistics

Diary

Main Features

Configurable

Top, side, bottom, front, "C" and pneumatic applicators are only some of the available possibilities.

Versatile

Fast and precise labeling, up to 150/min; freedom of choice of label's **measures** and **contents**.

Open System

Featuring **NiceLabel 2017** and a **free PLU editors**, the design of the labels is up to you.

Certified

MID European Directive and **OIML R-51** full certified. NEMESIS is an **ISO 9001** company.

Stainless steel rejection bin

Case study: Double control for pasta

NEMESIS MX Series combo checkweigher + metal-detector system performs a **double end-line control**, in these pictures working with dry and fresh pasta.

Firstly, products are **inspected by the metal-detector** and, in case of contamination, automatically discarded; non-contaminated ones are **then scaled and sorted**.

Again, overweight and underweight products are **rejected into the proper bin**.

Light/sound alarm tower

Modular plastic ejection conveyor

Data Analysis Software

Basic reports made simple, Advanced reports made real.

Designed to Be Your Friend

High-tech has never been so easy

Every NEMESIS system gives you **amazing possibilities** of data recording, analysing and reporting, always through the **easiest-to-use interface ever**.

The full **touchscreen** control panel of our devices integrates first level **data recording and reporting functionalities**.

Easy to use

Setup every function of the system with less than 5 touches on the screen.

USB

Automatically export all the weighing data and statistics on your pendrive.

Integrated printer

Get the total overview of every single batch directly on paper, reports structure is perfectly customizable on your needs.

Emergency stop

Quick and smart start/stop of the machine's conveyors.

Data management software

DataManager software maximizes the data storing and makes the export process into PDF or CSV files, or the download in USB flash drive or Network shared folders, totally automatic.

Brand new Analytics Series gives you the key for the complete data analysis, statistics and customizable reports options.

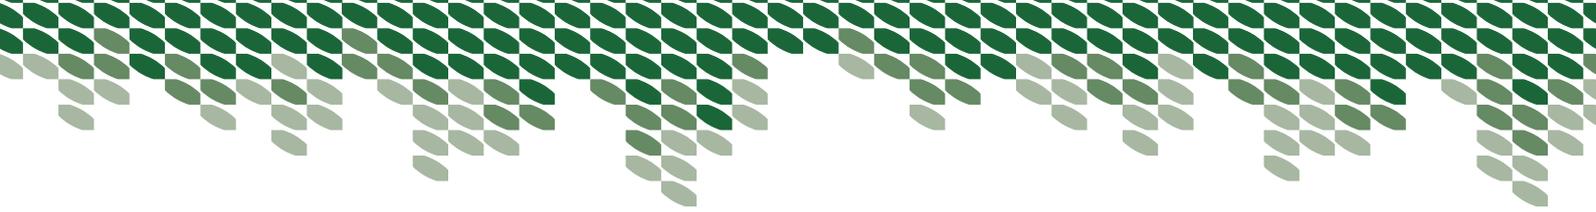

Efficiency monitor

Keep the full line's production rate, quality and results under control, with the help of specific **graphics and statistics**.

Fully customizable display

Manage your main working screen with a **smart designer**, that allows you to select the ideal information and data to display.

Try Analytics Lite to experience a top tier analysis machine, easy to install and user friendly since your first access, or explore the galaxy of opportunities Analytics Pro gives in your hands.

Touchscreen

Integrated on device

Offline

- Alibi **memory** data storage up to **6 months**
- Manual **export** of a single Batch report into **PDF** file
- Manual **download** of reports on **USB flash drive**

DataManager

Optionally on device

Offline

- Alibi **memory data storage** up to **24 months**
- **Automatic** generation of **reports**, for a single Batch or for all Batches, into **PDF** files
- **Automatic** generation of **reports**, for a single Batch or for all Batches, into **CSV** files
- Automatic **download** of reports on **USB flash drive**
- Automatic **download** of reports **on Network** shared folder
- **Advanced diagnostics** for connection status and automatic system re-synchronization
- **Secure data function** for offline working

Analytics Lite

Optionally on Server / PC

Online

- Simple **synoptic monitoring** of the connected machines
- **Up to 16** connected machines
- Weighing data saved in **real-time** into the database through **TCP/ IP** connection
- Weighing data can be imported **from USB flash drive**
- Reports can be generated **while the machine is OnLine**
- **Advanced reports** and data analysis of a single production Batch
- Reports can be exported in **PDF, XML and CSV**
- **Fully customizable reports**
- Incredibly **quick** and **easy installation**, no software expertise required
- **Embedded Database**, no configuration required

Analytics Pro

Optionally on Server / PC

Online

- Everything **Analytics Lite** can offer, and also:
- **Unlimited connected** machines
- **Merge multiple Batches** into a single report to analyse production efficiency
- **Merge data** from different machines to compare lines efficiency and perform advanced comparison
- Write **custom SQL queries**
- **Custom installation** (advanced software expertise required)
- **SQL Server database** (configuration required)

Customized Solutions

Your needs are our priority

In case of particular needs or unusual products, when our standard machines wouldn't be suitable, our Research & Development team will design and engineer specific "tailor-made" solutions.

Checkweigher with sorting system

NEMESIS has built and patented lines that recirculate the product back to the checkweigher, facilitating manual weight correction and minimizing over-batching with 100% control of the production batch.

Solutions for extreme conditions

Given the extreme operating conditions, some applications require in-depth researches to guarantee high accuracy of the measuring system.

Careful selection of materials and technical solutions allows the machine to work 24 hours a day with reduced maintenance intervals.

Limited space projects

When only a very limited space is available, a tailor-made machine is the only possible solution. This problem can be solved with a specific product's handling engineering, without altering the line's layout.

We Weigh Everything.
Just Everything.

Thousands and thousands of solutions,
for any kind of application.
